CLIENT REPORT

Website and SEO Growth Report

A practical roadmap to turn Altivon's website into a credible, searchable and conversion-focused B2B export platform for Europe and the United Kingdom.

Prepared for
ALTIVON GLOBAL

Prepared by Evolix Studio | Digital Growth Partner
Evolving Businesses Digitally.

Audit date: 4 September 2026

01 Executive recommendation

The website already communicates the products and export ambition clearly. The next step is to replace a single-page brochure experience with a buyer-ready system: precise product data, verifiable proof, country-specific search pages and stronger quotation and sample journeys.

The recommended priority is to establish technical credibility first, then build search visibility. This order protects the brand from attracting international inquiries before the product specification, MOQ, documentation and response process are fully prepared.

Priority	Business outcome	Recommended action
P1	Increase buyer confidence	Publish verified specifications, test documents, packaging and sample information.
P1	Capture higher-quality inquiries	Replace general inquiry actions with product, sample, COA and quotation journeys.
P1	Become indexable	Fix sitemap and robots files; connect Search Console and analytics.
P2	Rank for buyer-intent searches	Create separate product, country and private-label landing pages.
P2	Improve sales follow-up	Route inquiries into a lead tracker with owners, status and reminders.

02 Current digital foundation

Altivon currently presents itself as an India-based merchant exporter of moringa powder and banana powder for Europe and the UK. The site includes product summaries, packaging options, an export process, target markets, business registration information, an inquiry form and contact details.

Area	Current strength	Opportunity
Positioning	Two products and target regions are easy to identify.	Clarify exact grades, buyer types and competitive promise.
Product content	Basic specifications and packaging are described.	Add downloadable, lot-aware technical sheets and variant-level pages.
Trust	GST, IEC and founder details are visible.	Link certificates and laboratory evidence to each supported claim.
Conversion	A detailed inquiry form is available.	Create separate sample, COA and FOB/CIF quotation actions.
Search	Title, description and structured data are present.	Repair indexation files and expand beyond a single URL.
Social proof	Contact information is visible.	Add company LinkedIn, official Instagram and future verified buyer proof.

Verified technical finding: during the review, /robots.txt and /sitemap.xml returned generated-site 404 pages. These files should be corrected before the SEO expansion begins.

03 Product and proof architecture

International ingredient buyers evaluate suppliers through specification, consistency, documentation, commercial terms and responsiveness. 'Premium quality' is not enough without proof.

Required buyer asset	Information to include	Website action
Technical Data Sheet	Product form, origin, mesh, moisture, colour, shelf life, storage, applications.	Download TDS
Certificate of Analysis	Lot-specific microbiology, contaminants and product parameters.	Request latest COA
Certification folder	Only current and applicable ISO, FSSAI, organic or supplier certificates.	View verified documents
Commercial sheet	MOQ, capacity, packaging, sample policy, lead time and supported Incoterms.	Request commercial details
Packaging guide	Bulk and private-label formats, materials, weights and customisation rules.	Discuss packaging
Sample workflow	Sample sizes, documentation included, charge/refund policy and dispatch estimate.	Request a sample

Clarify the current '100 units MOQ.' Bulk ingredients should normally be described in kilograms, while private-label orders should be described in pouches or units.

04 Recommended website structure

URL	Page	Primary purpose
/	Home	Positioning, proof, products, markets and primary conversion path.
/products/moringa-leaf-powder	Moringa product page	Grade, specifications, applications, documentation, packaging and sample CTA.
/products/banana-powder	Banana product page	Exact variants, applications, specifications and quotation CTA.
/private-label	Private label	Buyer types, process, MOQ, packaging, artwork and compliance responsibilities.
/quality-documentation	Quality and documentation	Certificate scope, laboratory process, COA availability and traceability.
/packaging	Packaging	Bulk and retail formats with dimensions and customisation options.
/samples	Samples	Product selection, grade, destination, purpose and timeline.
/markets/united-kingdom	UK landing page	UK buyer uses, documentation discussion and localised RFQ.
/markets/germany	Germany landing page	Organic and QA-focused buying requirements.
/markets/netherlands	Netherlands landing page	Ingredient distributor and re-export positioning.
/insights	Knowledge centre	Buyer education, applications, documentation and sourcing content.
/contact	Contact/RFQ	Commercial qualification form and response expectations.

Country pages should contain genuine market-specific information. Avoid producing identical pages that only replace the country name.

05 SEO keyword and content map

Search intent	Priority keyword themes	Best destination
Core product	bulk moringa powder supplier India; moringa leaf powder exporter India	Moringa page
Core product	banana powder exporter India; bulk banana powder supplier	Banana page
Product variant	raw green banana powder wholesale; spray dried banana powder supplier	Banana variant sections
Country intent	moringa powder supplier UK; moringa powder supplier Germany	Country pages
Country intent	banana powder supplier Europe; banana powder importer supply UK	Country/product pages
Commercial	private label moringa powder; custom packaged natural powders	Private-label page
Technical	moringa powder COA; banana powder specification; food-grade fruit powder	Quality and insight pages

Initial publishing recommendation: two core product pages, three country pages, one quality page, one private-label page and four buyer-education articles. Expand only after Search Console shows which searches and countries are generating relevant impressions.

06 Conversion journey

A buyer should never reach a dead end after reading a product page. Each page should offer an action matched to the buyer's level of readiness.

Buyer stage	Buyer question	Recommended action	Information captured
Exploring	Is this product relevant?	Download specification	Name, company, email, country
Evaluating	Can the supplier meet our quality needs?	Request COA/documents	Product, grade, required documents
Testing	Does the sample match our formulation?	Request sample	Application, quantity, destination
Buying	What is the landed commercial offer?	Request FOB/CIF quote	MOQ, port, packaging, timeline
Private label	Can this be sold under our brand?	Discuss private label	Pack size, artwork, market, volume

Recommended primary CTA: 'Request Specifications and Sample Options.' It is easier for an early-stage buyer to accept than a general sales call.

07 Technical SEO checklist

Area	Requirement	Priority
Crawling	Valid robots.txt and XML sitemap	P1
Indexing	Google Search Console setup and sitemap submission	P1
Analytics	Analytics, form events, email, phone, sample and quote tracking	P1
Metadata	Unique title, description and canonical for every page	P1
Schema	Organization, Product, FAQ and Breadcrumb schema where applicable	P2
Performance	Compress images, lazy load media and monitor Core Web Vitals	P2
International	Use country-focused content first; add hreflang only when true translations exist	P2
Accessibility	Descriptive alt text, keyboard navigation and labelled forms	P2
Trust	Privacy, cookie, terms and documented claims	P1
Security	HTTPS, spam protection and safe form handling	P1

08 90-day roadmap

Phase	Website and SEO work	Milestone
Days 1-30	Validate product data; repair technical SEO; implement analytics; build product, quality and sample pages.	Buyer-ready foundation approved
Days 31-60	Launch UK, Germany and Netherlands pages; publish four technical articles; begin conversion reporting.	Search and campaign landing system live
Days 61-90	Improve pages using real search and inquiry data; add France; strengthen FAQs and internal links.	Optimisation cycle established

Success will be evaluated using qualified search impressions, product-page engagement, document/sample actions, qualified inquiries, response time and the progression from inquiry to quotation.

09 Client inputs required

- Exact product variants, grades, specifications and monthly capacity.
- Current supplier/manufacturer certificates and permission to use them.
- Recent lab reports or process for obtaining lot-specific COAs.
- Confirmed MOQ, sample policy, lead time and Incoterms.
- Real product, packaging, facility and sourcing photographs or video.
- A named team member responsible for responding to inquiries.
- Approval rules for public health, quality, organic and compliance claims.

Next step: conduct a product and documentation workshop, then approve the two product-page briefs before any campaign or outreach begins.

APPENDIX Research sources

Public sources reviewed on 4 September 2026. Business claims must still be verified against current certificates, laboratories, suppliers and destination-country requirements.
