EVOLIX INTERNAL PLAYBOOK

Evolix Internal Marketing Execution Playbook

Internal working document with website wirecopy, SEO specifications, detailed content scripts, outreach sequences, CRM logic, production requirements and quality controls.

Prepared for
ALTIVON GLOBAL

Prepared by Evolix Studio | Digital Growth Partner
Evolving Businesses Digitally.

INTERNAL USE ONLY - Version 1.0 - 4 September 2026

01 Operating decision

Do not sell Altivon 'social media management' as the main solution. Build a complete buyer-acquisition system: proof -> content/search -> specification or sample request -> CRM -> quotation -> follow-up.

Primary 90-day objective: make Altivon commercially buyer-ready, establish authority in four priority markets, and create a measurable process for generating and progressing qualified B2B conversations. Do not guarantee orders, leads, reach or follower numbers.

Workstream	Evolix output	Commercial purpose
Offer and proof	Product matrix, document index, claim approval sheet	Ensure marketing is accurate and buyer-ready
Website and SEO	Product, market, quality and conversion pages	Capture high-intent searches and inquiries
Content	Monthly calendar, Reels, documents, carousels and founder posts	Build authority and qualified reach
Outbound	Target-account list and personalised sequences	Create direct buyer conversations
CRM	Stages, fields, owners, reminders and reporting	Prevent lost leads and late follow-up

02 Non-negotiable client discovery

Complete and document these answers before publishing technical content or starting outreach.

- Is Altivon the manufacturer, merchant exporter, sourcing partner or private-label coordinator for each product?
- What exact moringa form is available: leaf powder, extract, whole leaf or another format?
- Which banana variants are genuinely available: raw green, ripe, spray-dried, dehydrated, freeze-dried or organic?
- What are the specification ranges for mesh, moisture, colour, microbiology, contaminants, shelf life and storage?
- Which certificates belong to Altivon and which belong to the manufacturer? Can the certificate scope be displayed?
- How and when is a lot-specific COA produced? Which laboratory is used?
- What is the true bulk MOQ in kg and the private-label MOQ in units?
- What monthly capacity is available for each grade?
- Which packaging materials and sizes are currently supported?
- Which Incoterms can the team quote correctly? Which ports are normally used?
- What is the sample size, charge, courier responsibility and dispatch estimate?
- Who owns inquiry response, technical follow-up, quotation and negotiation?
- What public footage can be captured at the product, supplier, testing and packaging stages?
- Which target countries and buyer types are commercially realistic based on price and product grade?

03 Claim approval matrix

Claim type	Publish only when	Safe interim language
Organic	A valid certificate covers the exact product, facility and current period.	Organic-certified option available subject to documentation confirmation.
ISO/FSSAI/HACCP	Certificate holder and scope are clear and relevant.	Produced through qualified manufacturing partners; documents available for review.
Third-party lab tested	A recent report exists and the tested lot/product is identifiable.	Lot-specific testing can be discussed based on buyer requirements.
EU/UK compliant	A qualified review confirms product and shipment requirements.	Documentation can be aligned with agreed buyer and destination requirements.
Organic/health benefits	Approved claims and verified composition support the copy.	Describe composition and intended commercial applications without medicinal promises.
Delivery time	Supplier, production and freight estimates are current.	Lead time confirmed with each quotation.
Worldwide trust	Real exports and permissioned proof exist.	Building partnerships with buyers in Europe and the UK.

04 Homepage improvement specification

Goal: communicate product, buyer, proof and next step within the first screen.

Recommended hero copy

H1: B2B Moringa and Banana Powder Supply from India
Supporting: For ingredient distributors, food manufacturers, nutraceutical businesses and private-label brands across Europe and the UK.
Primary CTA: Request Specifications and Sample Options
Secondary CTA: Explore Products

Homepage section order

Section	Required content	Conversion role
Hero	Buyer, products, origin, target markets and primary CTA	Immediate relevance
Product routes	Moringa and banana cards with grade, use and page links	Product selection
Buyer types	Distributor, manufacturer, nutraceutical and private label	Self-qualification
Proof bar	Only verified registrations, certificate scope and document availability	Trust
Quality process	Sourcing, verification, testing, packing and documentation	Reduce risk
Packaging	Bulk and private-label paths	Offer clarity
Priority markets	UK, Germany, Netherlands and France	Market relevance
Sample/quote path	Short explanation of what happens after inquiry	Conversion confidence
FAQ	MOQ, samples, documents, grades, Incoterms and lead time	Objection handling
Final CTA	Request specifications and sample options	Lead capture

05 Moringa product page wirecopy

SEO title: Bulk Moringa Leaf Powder Supplier from India | Altivon

Meta description: Source export-ready moringa leaf powder from India for food, nutraceutical and private-label applications. Request specifications, documentation and sample options.

Page opening

H1: Bulk Moringa Leaf Powder from India
Intro: Altivon supports international businesses seeking clearly specified moringa leaf powder for commercial product development, bulk distribution and private-label requirements. Available grades, MOQ and documentation are confirmed against each inquiry.
CTA: Request Moringa Specification

Required sections

- Available grade cards: conventional, organic or other only when confirmed.
- Specification table: origin, form, colour, mesh, moisture, shelf life, storage and packing.
- Applications: supplements, functional blends, tea or food uses based on confirmed suitability.
- Quality documents: TDS, COA, microbiology, pesticide, heavy metal, allergen and other available files.
- Packaging: bulk bag/drum and private-label options.
- Commercial FAQ: MOQ, capacity, sample, quote, Incoterm and lead time.
- Final action: request specification, request sample or request quotation.

Do not publish generic benefit comparisons such as 'seven times more vitamin C' unless Altivon's actual lot analysis and destination-market claim rules support them.

06 Banana product page wirecopy

SEO title: Bulk Banana Powder Exporter from India | Altivon

Meta description: Explore banana powder grades for food, beverage, bakery and nutrition applications. Request specifications, samples, bulk packaging and export quotation.

Page opening

H1: Bulk Banana Powder for Food and Nutrition Applications
Intro: Choose the banana powder grade that matches your formulation, processing and market requirements. Altivon coordinates product specifications, samples, commercial packaging and export documentation for qualified international buyers.
CTA: Discuss Your Application

Variant comparison block

Variant	Potential applications	Data needed before publishing
Raw green banana powder	Flour blends and resistant-starch applications	Verified starch, moisture, process, colour and mesh
Ripe banana powder	Bakery, cereal and flavour applications	Sugar/Brix, process, moisture and flavour profile
Spray-dried powder	Beverage and instant-mix applications	Carrier, solubility, moisture and microbiology
Dehydrated powder	Bakery, snack and food formulations	Drying method, particle size and storage
Organic option	Organic and clean-label product lines	Current organic certificate scope

If only one banana grade is currently available, remove unsupported variants and build the page entirely around that grade.

07 Quality and documentation page

Recommended H1: Product Quality, Testing and Export Documentation

Opening copy

International ingredient purchasing depends on evidence. Altivon organises product specifications and available manufacturing, laboratory and shipment documents so qualified buyers can evaluate the product before commercial commitment.

Document	Display rule	CTA
Technical Data Sheet	Public or gated depending on supplier permission	Download / request
Certificate of Analysis	Use example with identifying commercial data removed, or request-only	Request latest COA
Microbiology report	Show only current relevant report and test scope	Request report
Heavy metal/pesticide report	Explain product/lot relevance	Discuss buyer parameters
Organic certificate	Show certificate holder, scope and validity	View certificate
FSSAI/ISO/HACCP	Name certificate holder and manufacturing scope	View document index
Shipment documents	List possible documents, not guaranteed until quote	Discuss destination

08 Country landing-page template

Build the UK page first, then Germany and the Netherlands. Each page must be materially different.

UK page template

SEO title: Moringa and Banana Powder Supplier for UK Businesses | Altivon
H1: Moringa and Banana Powder Supply for UK Buyers
Opening: Altivon supports UK ingredient distributors, food businesses, nutraceutical brands and private-label companies seeking clearly specified powders from India. Product suitability, documentation, packaging and lead time are confirmed for each requirement.

- Who we serve in the UK.
- Available products and confirmed grades.
- Documents available for buyer review.
- Bulk and private-label packaging.
- Sample and quotation process.
- Destination and Incoterm qualification.
- CTA: Request UK supply information.

Germany variation: emphasise traceability, measurable specifications and verified organic evidence. Netherlands variation: emphasise distributor support, bulk supply and European re-export relevance. Do not state legal compliance without specialist confirmation.

09 Lead-form and CRM implementation

Required inquiry fields

Field	Type	Why needed
Name, company and website	Required	Identity and basic qualification
Business email and phone	Required	Follow-up routes
Country and destination port	Required / optional port	Market and quotation context
Business type	Select	Distributor, manufacturer, brand, retailer or other
Product and grade	Select	Technical routing
Quantity and frequency	Required	MOQ and capacity fit
Application	Required	Grade suitability
Packaging	Select	Bulk or private label
Documents required	Checkboxes	QA readiness
Sample requirement	Yes/no	Next action
Purchase timeline	Select	Priority

Automation

- Instant acknowledgement with a copy of the submitted requirement.
- CRM record with source, campaign, country and responsible owner.
- Internal notification for qualified inquiries.
- Reminder if no human response is logged within one business day.
- Document/sample task after qualification.
- Quotation follow-up reminders at agreed intervals.

10 Detailed Reel scripts - 1 to 4

Reel 1 - We are not another consumer superfood brand

Duration: 20-25 seconds

- 0-2s: Founder holds moringa and banana powder packs. On-screen: 'We are not launching another consumer superfood brand.'
- 2-6s: Close-up of both powders. Voiceover: 'Altivon is being built for businesses that need natural powders as ingredients.'
- 6-12s: Cut to specification sheet, pack and sample. Voiceover: 'That means clear grades, buyer-requested documents, samples and commercial packaging.'
- 12-18s: Founder to camera. Voiceover: 'Our focus is helping food, wellness and nutraceutical companies evaluate the right product before they buy.'
- 18-23s: Logo and CTA. On-screen: 'Request specifications and sample options.'

Caption: Altivon is building a transparent B2B sourcing route for moringa and banana powders from India. Follow our export-readiness journey, product explainers and buyer guides. For product specifications or sample options, contact our team.

Reel 2 - What export-ready moringa should look like

Duration: 15-20 seconds

- 0-2s: Macro powder shot. On-screen: 'Would you approve moringa from colour alone?'
- 2-6s: Show colour and texture. Voiceover: 'Colour and fineness are useful first signals, but they do not prove product quality.'
- 6-11s: Show labelled sample/TDS. Voiceover: 'A serious evaluation also checks mesh, moisture, microbiology and contaminants.'
- 11-16s: Show request form. Voiceover: 'Ask for the current specification and available test documents before comparing quotes.'
- 16-19s: CTA: 'Request the Moringa TDS.'

Caption: A product photo cannot replace technical evaluation. Altivon helps qualified buyers review specifications and available documentation before progressing to sampling and quotation.

Reel 3 - Powder pour test

Duration: 8-12 seconds

- 0-1s: Immediate powder pour in macro slow motion.
- 1-5s: Side lighting shows flow and texture. On-screen: 'Texture. Flow. Fineness.'
- 5-8s: Two labelled sample containers. On-screen: 'But the specification decides.'
- 8-11s: CTA: 'Request product details.'

Caption: Visual inspection starts the conversation. Specifications, application fit and test evidence complete it. Tell us which powder and application you are evaluating.

Reel 4 - Why 'premium quality' means nothing alone

Duration: 25-30 seconds

- 0-3s: Founder to camera. On-screen: 'Premium quality is not a specification.'
- 3-9s: Voiceover: 'Every supplier can write premium, natural and export-ready on a website.'

- 9-16s: Show redacted TDS/COA. Voiceover: 'A buyer needs measurable parameters, document scope and a sample that can be evaluated.'
- 16-23s: Show packing and label check. Voiceover: 'Quality becomes credible when the product, lot, process and paperwork agree.'
- 23-28s: Founder: 'That is the standard Altivon is working toward.' CTA: 'Ask for the proof pack.'

Caption: International buyers do not purchase adjectives. They evaluate product data, process, evidence and commercial reliability. Our communication will be built around what can be verified.

11 Detailed Reel scripts - 5 to 8

Reel 5 - Export packaging protection

Duration: 20-25 seconds

- 0-2s: Sealed pack close-up. On-screen: 'Packaging protects more than appearance.'
- 2-7s: Show inner liner. Voiceover: 'The inner food-grade barrier helps protect the powder from moisture and contamination.'
- 7-13s: Show sealing and label. Voiceover: 'The seal and label support integrity, identification and handling.'
- 13-19s: Show outer bag/carton. Voiceover: 'Outer protection must match shipment size and buyer requirements.'
- 19-23s: CTA: 'Discuss bulk or private-label packaging.'

> Caption: Packaging should be selected around the product, order size, transport route and buyer's handling process. Available Altivon formats are confirmed with each commercial requirement.

Reel 6 - Three commercial uses for banana powder

Duration: 18-22 seconds

- 0-2s: Three finished products appear quickly. On-screen: 'One ingredient. Different commercial grades.'
- 2-7s: Bakery cutaway. Voiceover: 'Ripe or dehydrated powder may support bakery and flavour applications.'
- 7-12s: Beverage cutaway. Voiceover: 'Spray-dried formats can be evaluated for instant mixes and beverages.'
- 12-17s: Flour blend cutaway. Voiceover: 'Raw green powder may suit flour and resistant-starch applications.'
- 17-21s: CTA: 'Tell us your application before choosing a grade.'

> Caption: The right banana powder begins with the intended application. Altivon will only promote the variants it can genuinely source and document.

Reel 7 - From inquiry to sample

Duration: 20-25 seconds

- 0-2s: Message notification. On-screen: 'What happens after you request a sample?'
- 2-6s: Requirement form. Voiceover: 'First, we confirm product, grade, quantity, application and destination.'
- 6-11s: Technical document. Voiceover: 'Then we share the relevant available specification and document index.'
- 11-17s: Sample packing. Voiceover: 'After alignment, the sample is labelled and prepared for evaluation.'
- 17-22s: Tracking screen. Voiceover: 'The commercial discussion follows your feedback.'
- 22-25s: CTA: 'Request sample options.'

> Caption: A sample without context creates confusion. The Altivon sample journey will qualify the application and documentation needs first, so the buyer evaluates the right product.

Reel 8 - Founder quality lesson

Duration: 25-30 seconds

- 0-3s: Founder: 'One thing we learned while preparing for export...'
- 3-10s: 'A supplier certificate does not automatically prove every product claim.'
- 10-17s: Show certificate scope fields. 'You must check the holder, product, facility, validity and scope.'
- 17-24s: 'That is why our marketing will separate verified documents from options available on request.'
- 24-29s: CTA: 'Follow Altivon for practical sourcing insights.'

Caption: Credibility improves when a company is precise about what is certified, what is tested and what must be confirmed for each order.

12 Carousel scripts - 1 and 2

Carousel 1 - Six checks before buying moringa powder

- Slide 1: Importing moringa powder? Check these 6 points before comparing price.
- Slide 2: Product identity - Confirm species, plant part, form and grade.
- Slide 3: Specification - Review colour, mesh, moisture, shelf life and storage.
- Slide 4: Safety evidence - Ask which microbiology and contaminant tests are available.
- Slide 5: Certificate scope - Confirm the certificate covers the product and facility.
- Slide 6: Commercial fit - Check MOQ, capacity, packaging and lead time.
- Slide 7: Sample alignment - Evaluate the same grade intended for supply.
- Slide 8: CTA - Request Altivon's moringa specification and sample options.

Caption: Price comparison is useful only after suppliers are compared on the same product identity, grade, specification and documentation basis.

Carousel 2 - Raw green vs ripe banana powder

- Slide 1: Raw green or ripe banana powder? Start with the application.
- Slide 2: Raw green - Neutral profile, flour blends and resistant-starch applications, subject to verified data.
- Slide 3: Ripe - Natural banana flavour and sweetness for bakery and food formulations.
- Slide 4: Processing matters - Dehydrated, spray-dried and freeze-dried formats behave differently.
- Slide 5: Ask for - Process, carrier if any, moisture, mesh, solubility and microbiology.
- Slide 6: Commercial fit - Confirm MOQ, bulk packaging and private-label needs.
- Slide 7: CTA - Tell Altivon your application before choosing a grade.

Caption: 'Banana powder' is a category, not a complete specification. The correct sourcing conversation begins with product application and technical requirements.

13 Carousel scripts - 3 and 4

Carousel 3 - Documents a European ingredient buyer may request

- Slide 1: The quotation is not the first document a serious buyer checks.
- Slide 2: Technical Data Sheet - Product identity and specification ranges.
- Slide 3: COA - Lot-specific results for agreed quality parameters.
- Slide 4: Safety tests - Microbiology, contaminants and residues where relevant.
- Slide 5: Declarations - Allergen, GMO, irradiation or other buyer-requested statements.
- Slide 6: Certifications - Verify holder, facility, product scope and validity.
- Slide 7: Shipment documents - Final requirements depend on product, destination and buyer.
- Slide 8: CTA - Request Altivon's available document index.

Caption: Documentation requirements vary by product, buyer and destination. Altivon should share only current, relevant and supportable evidence.

Carousel 4 - Bulk supply or private label

- Slide 1: Buying powder in bulk or launching under your own brand?
- Slide 2: Bulk supply - Best for importers, distributors and manufacturers that pack or formulate locally.
- Slide 3: Private label - Best for brands seeking retail-ready packaging under their identity.
- Slide 4: Bulk questions - Grade, kg requirement, pack format, port and Incoterm.
- Slide 5: Private-label questions - Pack size, artwork, label responsibility, units and market.
- Slide 6: Both routes need - Confirmed specification, evidence, sample and commercial terms.
- Slide 7: CTA - Share your requirement and we will guide the next step.

Caption: The same powder can require a completely different commercial process depending on whether the buyer needs an industrial ingredient or a retail-ready branded product.

14 Carousel scripts - 5 and 6

Carousel 5 - Mesh size and moisture

- Slide 1: Two small numbers can change how a powder performs.
- Slide 2: Mesh size describes particle fineness. Confirm the test method and range.
- Slide 3: Finer is not automatically better. The application determines suitability.
- Slide 4: Moisture affects stability, flow and storage risk.
- Slide 5: Compare suppliers using the same method and agreed limit.
- Slide 6: Check the lot COA against the agreed specification.
- Slide 7: CTA - Request a grade and specification discussion.

> Caption: Technical parameters are valuable when they are measurable, comparable and relevant to the buyer's process.

Carousel 6 - UK pre-sample checklist

- Slide 1: Before requesting an ingredient sample for the UK, define these details.
- Slide 2: Exact product and intended application.
- Slide 3: Required grade and specification limits.
- Slide 4: Document and testing expectations.
- Slide 5: Estimated order quantity and packaging.
- Slide 6: Destination, purchase timeline and commercial term.
- Slide 7: Evaluation method and decision owner.
- Slide 8: CTA - Request Altivon's UK sample information.

> Caption: Better sample briefs reduce wasted courier cost and help both parties evaluate a commercially relevant product.

15 Static and founder-post copy

Germany market post

Supplying a quality-focused market requires more than translating a brochure. German ingredient buyers may evaluate traceability, technical consistency, organic evidence and documentation before commercial terms. Altivon's Germany communication will therefore lead with verifiable product data, samples and a clear response process - not general export claims. If your company is evaluating moringa or banana powder from India, share the product, application and documentation your QA team requires.

Sample offer post

A sample is useful only when it represents the intended commercial grade. Altivon's sample process will first confirm product, variant, application, required documentation, estimated quantity and destination. Qualified buyers can then receive the relevant available specification and sample options. Contact us with your sourcing brief.

Building in public founder post

We are at an early and important stage: turning export ambition into an operating system international buyers can evaluate. That means challenging our own website claims, defining every product grade, organising documents, clarifying MOQ and building a consistent response process. We would rather communicate precisely than look bigger than we are. That principle will guide Altivon's growth.

Buyer poll follow-up

Price, consistency, documentation, MOQ and lead time are all important - but different buyers rank them differently. Our role is not to assume. Altivon will use buyer feedback to shape its sample packs, commercial information and product pages. What is the first risk your procurement team checks when evaluating a new ingredient supplier?

16 SEO article briefs

Working title	Intent	Required sections	CTA
How to Evaluate a Moringa Powder Supplier	Commercial research	Identity, spec, safety, certificate scope, MOQ, sample, questions	Request moringa TDS
Raw Green vs Ripe Banana Powder	Product selection	Source, process, characteristics, uses, tests, commercial questions	Discuss application
COA Checklist for Botanical Ingredient Buyers	QA education	Lot identity, methods, parameters, limits, laboratory, matching spec	Request document index
Bulk vs Private-Label Natural Powders	Commercial decision	Buyer type, packaging, MOQ, responsibilities, timeline, risks	Discuss supply model
Moringa Powder Supply for UK Businesses	Country/product	Buyers, uses, specification, documents, samples, packaging, quote brief	Request UK information
Why the Netherlands Matters in European Ingredient Distribution	Country authority	Import hub role, distributor needs, documents, commercial readiness	Speak to Altivon

Every article requires technical review. Write for procurement and product teams. Avoid exaggerated health benefits, fabricated market numbers and spun country content.

17 Outbound email sequence

Email 1 - Permission to send technical information

Subject: Moringa / banana powder sourcing for [Company]

Hi [First Name],

I noticed that [Company] works with [specific product category or market]. Altivon is an India-based B2B supplier of moringa leaf powder and banana powder for qualified bulk and private-label requirements.

If either ingredient is relevant to your current or upcoming product line, may I send the available specification, packaging and sample information? I would first like to understand the grade, application, quantity and documentation your team requires.

Regards,
[Name]
Altivon Global

Follow-up 1 - 4 to 5 working days

Hi [First Name],

Following up in case [ingredient] is relevant to your sourcing plans. Rather than sending a generic catalogue, we can share information matched to your application and expected order quantity.

Would it be useful if I sent a one-page product summary?

Follow-up 2 - Value-led

Hi [First Name],

One point buyers often clarify early is whether they require [specific grade / bulk / private label]. This changes the specification, packaging and MOQ conversation.

If you share your intended application, I can confirm whether our current supply options are worth evaluating.

Close-the-loop message

Hi [First Name],

I will close this thread for now so I do not fill your inbox. If moringa or banana powder becomes relevant later, I would be glad to share current specifications and sample options.

Thank you.

18 LinkedIn outreach scripts

Connection note

Hi [Name], I follow [Company]'s work in [specific category]. I am building Altivon's B2B supply relationships for moringa and banana powders from India and would value connecting with professionals working in ingredient sourcing and product development.

After acceptance

Thank you for connecting. I noticed [specific relevant signal]. Are moringa or banana-derived ingredients relevant to any current or future product lines? If useful, I can share a concise specification and sample overview rather than a general sales catalogue.

Document-post conversation starter

We recently published a checklist on the documents buyers may review before evaluating a botanical powder. Which quality parameter or supplier document creates the most friction for your team? I would value your perspective.

Rules

- Personalise with a real company or product observation.
- Do not attach a catalogue in the first connection request.
- Ask permission to send technical material.
- Do not move to WhatsApp unless the buyer supplies or approves that channel.
- Stop after the close-the-loop message unless the buyer re-engages.

19 Lead list research specification

Field	Requirement
Company	Official company name and website
Country	UK, Germany, Netherlands or France in phase 1
Segment	Distributor, nutraceutical, food manufacturer, private label, wholesaler
Relevance evidence	Existing natural ingredient, supplement, bakery, beverage or related product
Contact	Procurement, sourcing, product development, QA or founder for small firms
Business contact	Public professional email or approved LinkedIn route
Personalisation	One specific observation used in outreach
Product fit	Moringa, banana or both
Priority	A, B or C based on evidence
Source URL	Exact public source used for verification
Status	Not contacted, sent, replied, qualified, sample, quote, closed

Weekly operating target: research a manageable set of high-fit companies, verify each record, and send individually reviewed messages. Do not optimise for database size at the expense of relevance or compliance.

20 CRM pipeline and follow-up logic

Stage	Entry condition	Required next task
New prospect	Research record created	Verify company and relevance
Contact verified	Professional route confirmed	Prepare personalised outreach
Outreach sent	Message logged	Schedule follow-up
Replied	Buyer response received	Qualify requirement
Requirement collected	Product, grade, quantity, application and country known	Technical review
Specification sent	Approved document delivered	Ask for feedback/sample need
Sample requested	Buyer confirms evaluation need	Approve and dispatch sample
Sample dispatched	Courier/tracking logged	Confirm receipt and evaluation date
Quotation sent	Commercial offer issued	Schedule decision follow-up
Negotiation	Commercial or technical points open	Assign owner and deadline
Won / lost / nurture	Outcome known	Record reason and next review date

21 Content production brief

Capture in one monthly batch

- Founder: eight 20-30 second answers recorded in vertical 4K where possible.
- Products: macro pour, scoop, texture, colour comparison and labelled samples.
- Packaging: inner liner, seal, label, bag/carton, weighing and handling.
- Documents: redacted TDS/COA pages, certificate scope and QA checklist.
- Process: only real authorised supplier, laboratory or packaging footage.
- Applications: bakery, beverage, blend or retail mockups clearly labelled as examples.
- Photography: clean product, founder, team, packaging and documentation flat lays.

Visual direction

Use Altivon's dark navy/deep green visual identity, natural cream backgrounds, restrained gold accents, bright product lighting and clean technical layouts. Avoid overly rustic farm imagery, fake laboratory scenes and consumer-influencer aesthetics.

Format requirements

Asset	Size	Production rule
Instagram Reel	1080 x 1920	Hook in first 2 seconds; captions; 8-30 seconds
Instagram carousel	1080 x 1350	5-8 slides; readable technical copy
LinkedIn document	A4 portrait PDF	6-10 pages; one idea per page
LinkedIn video	4:5 or 1:1	Native upload; subtitles; founder or process-led
Website photography	Landscape and square	Real high-resolution source files

22 90-day internal execution board

Period	Evolix	Altivon	Gate
Week 1	Discovery, product matrix, claims register	Supply exact data and documents	No public claims until approved
Week 2	Website IA, page briefs, LinkedIn/IG setup	Approve positioning and provide access	Accounts and page plan approved
Week 3	Filming plan, first content batch, CRM setup	Film founder/product/process	Technical copy approved
Week 4	Launch pages and first posts	Respond to inquiries	Tracking verified
Month 2	Country pages, weekly content, lead research/outreach	Review qualified leads and issue documents	Sample process functioning
Month 3	Optimisation, France page, reporting and next plan	Share sales outcomes and objections	Decide scale/adjustment

23 KPI dashboard

Area	Metric	Review	Action
SEO	Qualified impressions by product/country query	Monthly	Expand or improve pages with relevant impressions
Website	Product engagement and conversion actions	Monthly	Fix friction and CTA placement
Content	Qualified reach, saves, document views and completion	Weekly	Repeat strong formats/topics
Outbound	Delivery, replies, positive replies and qualifications	Weekly	Improve list quality and messaging
Lead handling	Response time and overdue follow-ups	Weekly	Reassign or automate tasks
Sales	Samples, quotations, negotiations and outcomes	Monthly	Identify commercial blockers

Do not report follower growth alone. The decision-ready summary should show which countries, product topics and outreach segments are creating qualified commercial progression.

24 Pre-publish QA checklist

Check	Approval question
Brand	Is this clearly Altivon content, with no accidental Evolix consumer branding?
Product	Is the exact product/variant currently available?
Specification	Does every number match an approved source?
Certificate	Are holder, scope, product and validity correctly represented?
Health claim	Is the statement permitted and supported for the target market?
Image/video	Is it real or clearly presented as an example? Is permission documented?
CTA	Is there one clear next step and a functioning destination?
Lead routing	Will the inquiry enter the CRM with an owner?
Tracking	Are campaign and conversion events recorded?
Response	Can Altivon meet the promised response or follow-up timing?

Internal next step: run the product/documentation workshop, complete the claims register, and approve the homepage plus two product-page briefs before content production begins.

APPENDIX Research sources

Public sources reviewed on 4 September 2026. Business claims must still be verified against current certificates, laboratories, suppliers and destination-country requirements.
